Automation for Food Engineering: Food Quality Quantization and Process Control (Contemporary Food Science) Yanbo Huang, A. Dale Whittaker, Ronald E. Lacey

In the past ten years electronics and computer technologies have significantly pushed forward the progress of automation in the food industry. The application of these technologies to automation for food engineering will produce more nutritious, better quality, and safer items for consumers. Automation for Food Engineering: Food Quality Quantization and Process Control explores the usage of advanced methods, such as wavelet analysis and artificial neural networks, to automated food quality evaluation and process control. It introduces novel system prototypes, such as machine vision, elastography, and the electronic nose, for food quality measurement, analysis, and prediction.

The book discusses advanced techniques, such as medical imaging, mathematical analysis, and statistical modeling, which have proven successful in food engineering. The authors use the characteristics of food processes to describe concepts, and they employ data from food engineering applications to explain the methods. To aid in the comprehension of technical information, they provide real-world examples and case studies from food engineering projects.

The material covers the frameworks, techniques, designs, algorithms, tests and implementation of data acquisition, analysis, modeling, prediction, and control in automation for food engineering. It demonstrates the techniques for automation of food engineering, and helps you in the development of techniques for your own applications. Automation for Food Engineering: Food Quality Quantization and Process Control is the first and only book that gives a systematical study and summary about concepts, principles, methods, and practices in food quality quantization and process control.

From reader reviews:

Kurt Haney:

Spent a free the perfect time to be fun activity to do! A lot of people spent their sparetime with their family, or their friends. Usually they undertaking activity like watching television, about to beach, or picnic in the park. They actually doing ditto every week. Do you feel it? Would you like to something different to fill your own free time/ holiday? Could be reading a book could be option to fill your totally free time/ holiday. The first thing that you will ask may be what kinds of reserve that you should read. If you want to try look for book, may be the e-book untitled Automation for Food Engineering: Food Quality Quantization and Process Control (Contemporary Food Science) can be excellent book to read. May be it could be best activity to you.

Edward Knudsen:

Playing with family within a park, coming to see the water world or hanging out with pals is thing that usually you might have done when you have spare time, then why you don't try factor that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Automation for Food Engineering: Food Quality Quantization and Process Control (Contemporary Food Science), you can enjoy both. It is very good combination right, you still need to miss it? What kind of hangout type is it? Oh can occur its mind hangout guys. What? Still don't understand it, oh come on its identified as reading friends.

Clair Lemanski:

A lot of e-book has printed but it is different. You can get it by web on social media. You can choose the most effective book for you, science, witty, novel, or whatever by searching from it. It is called of book Automation for Food Engineering: Food Quality Quantization and Process Control (Contemporary Food Science). Contain your knowledge by it. Without departing the printed book, it may add your knowledge and make you actually happier to read. It is most significant that, you must aware about e-book. It can bring you from one spot to other place.

Tracy Lindsey:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is published or printed or descriptive from each source in which filled update of news. In this particular modern era like at this point, many ways to get information are available for you. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Are you hip to spend your spare time to spread out your book? Or just in search of the Automation for Food Engineering: Food Quality Quantization and Process Control (Contemporary Food Science) when you necessary it?
