Governing Cotton: Globalization and Poverty in Africa (International Political Economy Series) Adam Sneyd

Thousands of people around the world are currently engaged in efforts which they believe will make African cotton work better for the millions of people who grow this crop and the millions more who depend upon it. This book traces the historic relationships between cotton and poverty south of the Sahara and assesses aspects of the new social concern evident in the area. Taking an empirical international political economy approach, it details the ways in which globalization has enabled poverty reduction and poverty maintenance on African cotton farms. Sneyd argues that while cotton farming and poverty will be connected for many years to come, there is hope that these issues are now on the agenda.
