Case Presentations in Arterial Disease provides a compilation of various case studies concerning arterial diseases. This book covers vascular trauma and miscellany, upper limb symptoms, chronic pain in the foot, and abdominal presentations.

Organized into 10 chapters, this book begins with an overview of case studies concerning intermittent claudication in the calf. This text then examines a case study of a patient with a history of recurrent severe thigh claudication after undergoing an aortobifemoral bypass for occlusive aorta-iliac disease. Other chapters consider the case study of acute pain associated with coldness, discoloration, and numbness in the leg. This book discusses as well various case studies concerning abdominal aortic aneurysm. The final chapter deals with case studies involving hepatic artery aneurysm.

This book is a valuable resource for vascular surgeons and clinical researchers.
