Occupation for Occupational Therapists

Occupation for Occupational Therapists

This book engages with the renewed focus on the centrality of occupation in occupational therapy. It is informed by a subtle but significant shift in thinking, towards a recognition that humans are occupational beings, not merely that occupation is an important part of human life. The emergence of this publication is therefore timely amidst the debate on occupational science.

The book is aimed at students of occupational therapy and interested clinicians. It is designed to support them to work in a way that is grounded in and focussed on occupation. The chapters follow a common structure, which underpins a stimulating array of content. This extends from an examination of conceptual issues such as creativity and flow to clinical examples of practising in an occupational way. The final section provides a glimpse of new practice frontiers, including working with refugees and population health.
