Modern General Topology: 33 (North-Holland Mathematical Library)

J.-I. Nagata

Modern General Topology: 33 (North-Holland Mathematical Library) J.-I. Nagata

This classic work has been fundamentally revised to take account of recent developments in general topology. The first three chapters remain unchanged except for numerous minor corrections and additional exercises, but chapters IV-VII and the new chapter VIII cover the rapid changes that have occurred since 1968 when the first edition appeared.

The reader will find many new topics in chapters IV-VIII, e.g. theory of Wallmann-Shanin's compactification, realcompact space, various generalizations of paracompactness, generalized metric spaces, Dugundji type extension theory, linearly ordered topological space, theory of cardinal functions, dyadic space, etc., that were, in the author's opinion, mostly special or isolated topics some twenty years ago but now settle down into the mainstream of general topology.

From reader reviews:

Teresa Hunter:

In other case, little people like to read book Modern General Topology: 33 (North-Holland Mathematical Library). You can choose the best book if you appreciate reading a book. Provided that we know about how is important some sort of book Modern General Topology: 33 (North-Holland Mathematical Library). You can add knowledge and of course you can around the world with a book. Absolutely right, due to the fact from book you can realize everything! From your country until foreign or abroad you will end up known. About simple point until wonderful thing it is possible to know that. In this era, you can open a book as well as searching by internet system. It is called e-book. You can use it when you feel uninterested to go to the library. Let's study.

Sonia Cramer:

The e-book untitled Modern General Topology: 33 (North-Holland Mathematical Library) is the reserve that recommended to you to read. You can see the quality of the guide content that will be shown to you actually. The language that writer use to explained their way of doing something is easily to understand. The article writer was did a lot of research when write the book, and so the information that they share for you is absolutely accurate. You also can get the e-book of Modern General Topology: 33 (North-Holland Mathematical Library) from the publisher to make you more enjoy free time.

Gordon Miller:

A lot of e-book has printed but it is unique. You can get it by net on social media. You can choose the best book for you, science, comedian, novel, or whatever through searching from it. It is called of book Modern General Topology: 33 (North-Holland Mathematical Library). You can include your knowledge by it. Without causing the printed book, it could add your knowledge and make an individual happier to read. It is most crucial that, you must aware about book. It can bring you from one destination to other place.

Annie Resnick:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information from your book. Book is prepared or printed or highlighted from each source in which filled update of news. In this modern era like currently, many ways to get information are available for you actually. From media social just like newspaper, magazines, science guide, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Ready to spend your spare time to open your book? Or just looking for the Modern General Topology: 33 (North-Holland Mathematical Library) when you necessary it?
