Construction Mathematics Surinder Virdi, Roy Baker, Narinder Kaur Virdi

Construction Mathematics is an introductory level mathematics text, written specifically for students of construction and related disciplines.

- Learn by tackling exercises based on real-life construction maths. Examples include: costing calculations, labour costs, cost of materials and setting out of building components.
- Suitable for beginners and easy to follow throughout.
- Learn the essential basic theory along with the practical necessities.

The second edition of this popular textbook is fully updated to match new curricula, and expanded to include even more learning exercises. End of chapter exercises cover a range of theoretical as well as practical problems commonly found in construction practice, and three detailed assignments based on practical tasks give students the opportunity to apply all the knowledge they have gained.

Construction Mathematics addresses all the mathematical requirements of Level 2 construction NVQs from City & Guilds/CITB and Edexcel courses, including the BTEC First Diploma in Construction. Additional coverage of the core unit Mathematics in Construction and the Built Environment from BTEC National Construction, Civil Engineering and Building Services courses makes this an essential revision aid for students who do not have Level 2 mathematics experience before commencing their BTEC National studies. This is also the ideal primer for any reader who wishes to refresh their mathematics knowledge before going into a construction HNC or BSc.

From reader reviews:

Ward Beaver:

The experience that you get from Construction Mathematics is the more deep you looking the information that hide within the words the more you get interested in reading it. It does not mean that this book is hard to recognise but Construction Mathematics giving you thrill feeling of reading. The author conveys their point in particular way that can be understood simply by anyone who read it because the author of this guide is well-known enough. This particular book also makes your current vocabulary increase well. Therefore it is easy to understand then can go with you, both in printed or e-book style are available. We suggest you for having this Construction Mathematics instantly.

Roger Alford:

This Construction Mathematics usually are reliable for you who want to certainly be a successful person, why. The explanation of this Construction Mathematics can be among the great books you must have is giving you more than just simple reading through food but feed you actually with information that possibly will shock your preceding knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions in e-book and printed people. Beside that this Construction Mathematics forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we realize it useful in your day pastime. So , let's have it and enjoy reading.

Maria Levine:

You are able to spend your free time to see this book this reserve. This Construction Mathematics is simple bringing you can read it in the recreation area, in the beach, train along with soon. If you did not possess much space to bring typically the printed book, you can buy often the e-book. It is make you much easier to read it. You can save typically the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Thomas Rojas:

As a college student exactly feel bored to reading. If their teacher asked them to go to the library or to make summary for some reserve, they are complained. Just very little students that has reading's heart or real their passion. They just do what the professor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that looking at is not important, boring in addition to can't see colorful images on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Construction Mathematics can make you feel more interested to read.
