**Our Religious Brains: What Cognitive Science Reveals about Belief, Morality, Community and Our Relationship with God** Ralph D. Mecklenburger, Foreword by Dr. Howard Kelfer, Preface by Dr. Neil Gillman

This groundbreaking, accessible book examines the implications of cognitive science for theology. It reviews current theory on how our brains construct our world in order to guide us safely through life, creating and appreciating meaning as we go. It examines what cognitive science reveals about community and asks why we should be loyal to one faith if, in fact, all major religious traditions deal effectively with universal human needs.
