Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library) Vyacheslav V. Komarov

The application of microwave energy for thermal processing of different materials and substances is a rapidly growing trend in modern science and engineering. In fact, optimal design work involving microwaves is impossible without solid knowledge of the properties of these materials. Here's a practical reference that collects essential data on the dielectric and thermal properties of microwaveable materials, saving you countless hours on projects in a wide range of areas, including microwave design and heating, applied electrodynamics, food science, and medical technology. This unique book provides hard-to-find information on complex dielectric permittivity of media at industrial, scientific, and medical frequencies (430 MHz, 915 MHz, 2.45 GHz, and 5.8 GHz). Written by an expert in the field, this authoritative book does an exceptional job at presenting critical data on various materials and explaining what their key characteristics are concerning microwaves.

From reader reviews:

Lavinia Arthur:

Do you have favorite book? For those who have, what is your favorite's book? Guide is very important thing for us to understand everything in the world. Each publication has different aim or maybe goal; it means that reserve has different type. Some people sense enjoy to spend their time to read a book. They can be reading whatever they get because their hobby is usually reading a book. What about the person who don't like examining a book? Sometime, person feel need book when they found difficult problem as well as exercise. Well, probably you will require this Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library).

Claire Underwood:

The book Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the good thing like a book Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library)? Some of you have a different opinion about book. But one aim that book can give many information for us. It is absolutely right. Right now, try to closer together with your book. Knowledge or information that you take for that, you may give for each other; you may share all of these. Book Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library) has simple shape but the truth is know: it has great and large function for you. You can appear the enormous world by open up and read a publication. So it is very wonderful.

Stacia Cobb:

Reading a e-book tends to be new life style within this era globalization. With examining you can get a lot of information which will give you benefit in your life. Along with book everyone in this world can share their idea. Textbooks can also inspire a lot of people. A lot of author can inspire their reader with their story or their experience. Not only the storyplot that share in the ebooks. But also they write about the data about something that you need instance. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors on earth always try to improve their talent in writing, they also doing some study before they write for their book. One of them is this Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library).

Jerri Jackson:

You can obtain this Handbook of Dielectric and Thermal Properties of Materials at Microwave Frequencies (Artech House Microwave Library) by visit the bookstore or Mall. Merely viewing or reviewing it may to be your solve issue if you get difficulties for your knowledge. Kinds of this guide are various. Not only through written or printed but also can you enjoy this book by e-book. In the modern era similar to now, you just

looking by your mobile phone and searching what your problem. Right now, choose your personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still change. Let's try to choose proper ways for you.
